

U.S. Citizen, authorized to work in the U.S. without restrictions

## Summary

Motivated and detail-oriented freshman pursuing a degree in Cybersecurity Engineering, eager to apply foundational knowledge of network security, risk management, and ethical hacking in a hands-on environment. Seeking an internship opportunity to contribute to a team, develop practical skills, and gain real-world experience in protecting information systems and ensuring data integrity. Committed to learning and growing in the cybersecurity field while supporting organizational security goals.

## Education and Projects

### George Mason University

*Bachelor of Science in Cyber Security Engineering*

Relevant Courses: CYSE 101, CYSE 130, ENG 107

Fairfax, VA

Expected May 2027

- ENG 107 - Completed group assignments in engineering with a leadership role in my group
- CYSE 130 - Learned Python basics, data structures, and automation scripting
- CYSE 101 - Studied the fundamentals of network security, risk management, and threat analysis

### HackOverflow - Hackathon Veteran PTSD Assistance Project

- Created a heart rate monitoring system using an Arduino-based LCD and heart rate sensor to assist veterans with PTSD symptoms like anxiety
- Implemented visual and auditory feedback (LED and buzzer) to guide users through breathing exercises when high stress levels were detected

## Certifications

CompTIA, Security+

Certified: October 2024

Google, Cybersecurity Certificate

Certified: October 2024

AWS, Certified Solutions Architect - Associate

In Progress

CompTIA, Network+

In Progress

## Work Experience
